

For this image the denoising strength was decreased from 0.75 to 0.5.

For this image the mask blur was increased and chose latent noise. Looks like small glitches so it is pretty cool.

For this image the flower was highlighted with the brush, then chose latent nothing, which removed the big rose and tried to make it seem like it was a whole bush of roses.

For this image the sampling size was increased to 30 and the denoising strength to 0.5. The red colored brushed was applied on the door to make it red, and pink to fill in the corner of the house. It looks a little bit different other than the changes purposely made.
